# Solutions

## Newbuilding

### High-quality shipbuilding services for standard and custom vessels.

Whether it is newbuild vessels constructed to proven designs and intended to maximise efficiency and economy, or custom or semi-custom vessels using one-off designs and bespoke systems to meet the client's specific needs. Integrated production, from design and engineering to steel-cutting and outfitting, at our three shipyards in the Netherlands enables us to guarantee high quality and short delivery times.

## Repair & Conversion

### For all your maintenance, repair, refit and conversion needs.

Neptune offers a wide portfolio of maintenance, repair and conversion services, all undertaken in a fast, secure and above all safe manner. These can take place at our yards or at alternative locations specified by the client. At our Dutch facilities we serve a broad portfolio of vessels that includes inland cargo vessels, river cruisers, workboats and other vessel types. Neptune also has all the necessary expertise for in-house conversions and refits. The experienced team of Neptune Repair is committed to quality, safety and is ISO 9001 certified. This approach ensures minimal downtime for your repair and conversion projects.

## Chartering

### Turn-key chartering solutions for marine equipment.

Neptune offers a range of its flexible, high-quality marine equipment for both short and long term charter. Built to the highest standards and efficient and economical, Neptune has pontoons, jack-ups and deck equipment available for almost any application, from towage and general support and maintenance to specialist vessels for activities such as cable laying and aquaculture. For a quick and simple integrated chartering experience, Neptune is ready to supply and mobilize the equipment that meet your exact needs, for the duration that you need it.

## Mobilisation

### Preparing your vessel for its next contract.

Neptune also offers turnkey solutions for mobilisation. Our services include the fabrication and construction of deck structures, including frames and grillages, and the rental of deck equipment and transport. By handling every aspect of the mobilisation process at a single site we provide a fast turnaround and minimum downtime. Projects can either be carried out at Neptune's facilities in the Netherlands, close to the Port of Rotterdam, or at another location that is convenient.

# Charter equipment

## An extensive fleet of high-quality marine equipment

Neptune Marine holds an extensive and well-maintained fleet of marine equipment. Immediately available for charter, we can offer you pontoons, barges, jack-ups, deck equipment and much more within a short time.

Our experience in shipbuilding, ship repair and mobilisation guarantees fast, secure and on time delivery of your marine equipment.

### Pontoons / Barges

#### **Pontoons and barges for transport, offshore accommodation and much more.**

Our robust pontoons and barges are immediately available for charter. EuroPontoons are tough, robust pontoons and barges, ranging from 30m up to 100m in length, that can be used for almost any application. We keep a full range of standard pontoons and barges in stock, immediately available for sale, lease or charter.

### Deck equipment

#### **Deck and other equipment available for hire – for all your project needs.**

At Neptune we supply and mobilise equipment of all types on board. Equipment available includes deck cranes, anchors, spud legs and cans, winches, generators and cable laying equipment. Other equipment can be sourced at short notice through our network of suppliers and industrial partners.

### Jack-ups

#### **Jack-ups for civil construction and offshore projects.**

Our reliable and safe jack-ups are immediately available for charter. The Neptune EuroJack-Up is a multi-purpose, scalable jack-up barge design which can be deployed for any maritime operation that requires a stable platform positioned above the maximum wave height of the water.

### Modular solutions

#### **Modular Pontoon Systems (MPS): modular pontoons, jack-ups and workboats.**

Key features:

- Individual modules built to standard container specifications
- Easily transported to anywhere with access by road, rail, sea or air
- Assisted on-site assembly using high-strength fixings
- Full range of accessories and options
- Can be disassembled for transport elsewhere.

Do you need equipment or a vessel immediately?

# Newbuild products

## Standard and custom newbuild vessels

Neptune Marine offers innovative and robust vessels and marine equipment, built to the highest Dutch standards. Our portfolio of standard and custom newbuild products ensures reliable and sustainable products, which can be delivered within a short delivery time.

### EuroCarriers

**EuroCarriers: market-leading multi-purpose workboats for marine operations.**

EuroCarriers are robust multi-purpose workboats for marine activities; from civil construction to offshore wind, fish farm support and much more.

### EuroTugs

**EuroTugs: shallow draft tugboats for towage, anchor handling and much more.**

EuroTugs are shallow draft tugboats with high performance towage capacity and free deck space, for excellent reliability in marine activities.

### EuroPontoons

**Pontoons and barges for transport, offshore accommodation and much more.**

Our robust pontoons and barges are immediately available for sale or charter.

### Dredgers

**EuroHoppers: Safe and secure dredging vessels for any operation.**

Safe and secure dredging solutions for maintaining waterways and material extraction.

### CrewTenders

**EuroTenders: High performance crew transfer vessels for the offshore industry.**

High performance crew transfer vessels for moving offshore personnel and light cargo in safety and comfort.

## 4 Locations in the Netherlands

- Hardinxveld-Giessendam
- Aalst
- Hardinxveld-Giessendam
- Groningen

Neptune Marine operates from three yards in the Netherlands; two in Hardinxveld and one at Aalst, and all of them are conveniently close to the Port of Rotterdam and easily accessible from all major European waterways. From our Groningen office we coordinate various activities abroad. Our locations offer a variety of slipways and moorings, and are easily accessible

from the Port of Rotterdam and Europe's inland waterway network.

Neptune also has a 250-metre quay facility for the repair and mobilisation of vessels and pontoons. In combination with a mobile crane with a capacity of 10 tonnes at 30 metres, this facility can carry out a wide range of repair and mobilisation works.

## Azimuth tugboats

**EuroAzimuth tugs: reliable and sustainable harbour tugs for towage and vessel handling.** Our premium harbour tugs deliver reliability, sustainability and manoeuvrability for all your towage and vessel handling needs.

## EuroSupporters

**EuroSupporters: all-round support vessels for platform support, cable-laying and more.** EuroSupporters are versatile all-round support vessels, with maximum free deck space, for platform support, light cargo, cable-laying and more.

## Jack-ups

**EuroJack-ups: stable jack-up platforms for civil construction and offshore operations.** Our versatile EuroJack-up barges provide stable platforms for maritime construction and other missions both near and offshore.

## Aquaculture vessels

**Aquaculture support vessels: innovative and sustainable solutions for aquaculture and fish farm support.** Proven vessels optimised for aquaculture and fish farm support, and designed for easy integration of client systems.

## Modular solutions

**Modular Pontoon Systems (MPS): modular pontoons, jack-ups and workboats.** Neptune offers Modular Pontoon Systems (MPS) for the on-site assembly of pontoons and workboats in areas of restricted access.

## Cargo vessels

**EuroTrader: State-of-the-art cargo vessels for short-sea shipping.** The EuroTrader - state-of-the-art cargo vessels for short-sea shipping. Efficiency, economy and reliability all come as standard.

# Marine solutions that work for you

**Neptune Marine offers a broad range of maritime solutions, including newbuilding, repair, equipment charter and other complementary services. We work with our clients and suppliers to create and deliver solutions that are versatile, innovative and reliable.**

**At our locations in the Netherlands, we apply integrated production processes from the design and engineering phases right through to steel-cutting and mobilisation to guarantee high quality and short delivery times.**

#### **Bespoke solutions**

From the very beginning of a project we put our customers' demands in first place. This collaboration plus our ability to customise every vessel ensures that the result perfectly fits the needs of our clients.

#### **Short lines of communication**

We can make changes to the design throughout the building process due to short lines of communication between the office and our shipyards. We therefore build vessels that are ready to work from day one, yet can still be delivered in a short time frame.

#### **Years of expertise**

The many years of experience, including the building of yachts, means that we prioritise high quality in everything that we do.

We use high-quality materials and work together with preferred suppliers to guarantee the best possible Dutch quality.

#### **Pride in our people**

At Neptune we are proud of how we work and of our people, and we do everything we can to take care of them. We want to be sure that our employees work in a safe, sustainable environment.

#### **Certification**

We have implemented a range of safety and quality guidelines and standards to ensure a safe working environment. These include ISO 9001 and VCA certification.
